

Health Savings Accounts (HSAs)

For Individuals / Employees

Get more out of your high deductible health plan with an HSA!

You can think of an HSA as a designated place to set aside money for future health care expenses and watch it grow tax-free. You choose: how much you want to contribute to the account, if you'd like to invest it to grow your money even faster, and how much you want to spend from it and when.

These features make the HSA a *triple-tax advantaged benefit* – offering you greater savings that are unmatched in the marketplace.

An HSA that is Easy-to-Use

- ✓ Smarter set-up with online enrollment
- ✓ User-friendly mobile app and participant web site
- ✓ Support staff available throughout plan lifecycle – *from pre-enrollment and beyond*
- ✓ Debit card with 24/7 access to IVR service support
- ✓ Simplified ways to interact with HSA funds, transactions, and investments
- ✓ Intuitive plan management tools

Stack it with Your FSA too!

If your employer offers a Flexible Spending Account, you can pair the HSA with it. The FSA will be considered a “Limited Purpose FSA,” which will only cover dental and vision costs tax-free. This is another great advantage of having an HSA.
